

Investing for Success

**Under this agreement for 2022
Bauple State School will receive**

\$18,220*

This funding will be used to

- Support student learning and achievement in English (reading and writing).
This will be achieved by providing release time for teaching staff to engage in the planning and moderation process. Funds will also be used to employ staff to support English curriculum delivery and support identified student learning needs.

Our initiatives include

- Teaching staff will be released to engage in pre-moderation (planning). The intent will be for staff to build a deeper understanding of learning intent within focus English units (Australian Curriculum).
- Staff will collaboratively plan effective pedagogical strategies. This will be achieved through the Small School Network of teachers/principals, and by accessing regional support via the Principal Advisor for Teaching and Learning (PATL).
- Teaching staff will regularly review school English data on an individual, cohort and school level to make informed decisions about teaching and learning, working towards the identified 6 monthly markers/goals set in the Bauple SS Annual Improvement Plan.
- Teaching staff will identify marker students to support individual learning needs and lift learning outcomes/results. Teaching staff will engage in the “during” moderation phase of teaching and learning. This will include the enactment of the CASW process (Collaborative Assessment of Student Work) with fellow teachers/principals in the Small School Network. The aim being to identify student strengths and areas for individual feedback and support. This process enhances the enactment of pedagogical approaches and will support continued quality teaching and learning.
- Funding will be allocated to employ Teacher Aides to support English learning. Teacher Aides will support whole class, small group and individual learning, as identified by school data review, moderation and CASW.

Our school will improve student outcomes by

Allocated for teaching staff to be released for moderation and CASW.	\$2,000
Allocated to employ Teacher Aides to further support teaching and learning in English (as detailed above).	\$16,220
